Joint Technical Interoperability Plan (jTIP)/ Enterprise Architecture Steering Committee (EASC)

PEO STRI EASC Mission: To provide technical, engineering, and architectural guidance and standards which facilitate Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities".

Industry Involvement

Bottom Line Up Front -

- Plan to include industry, users and other services in EASC meetings
- Plan to share the jTIP and other EASC products
- Plan to look at standardizing products (i.e. OneSAF) for solicitations
- Look forward to industry involvement to help solve the I2 issues

PEO STRI EASC Mission: To provide technical, engineering, and architectural guidance and standards which facilitate Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities".

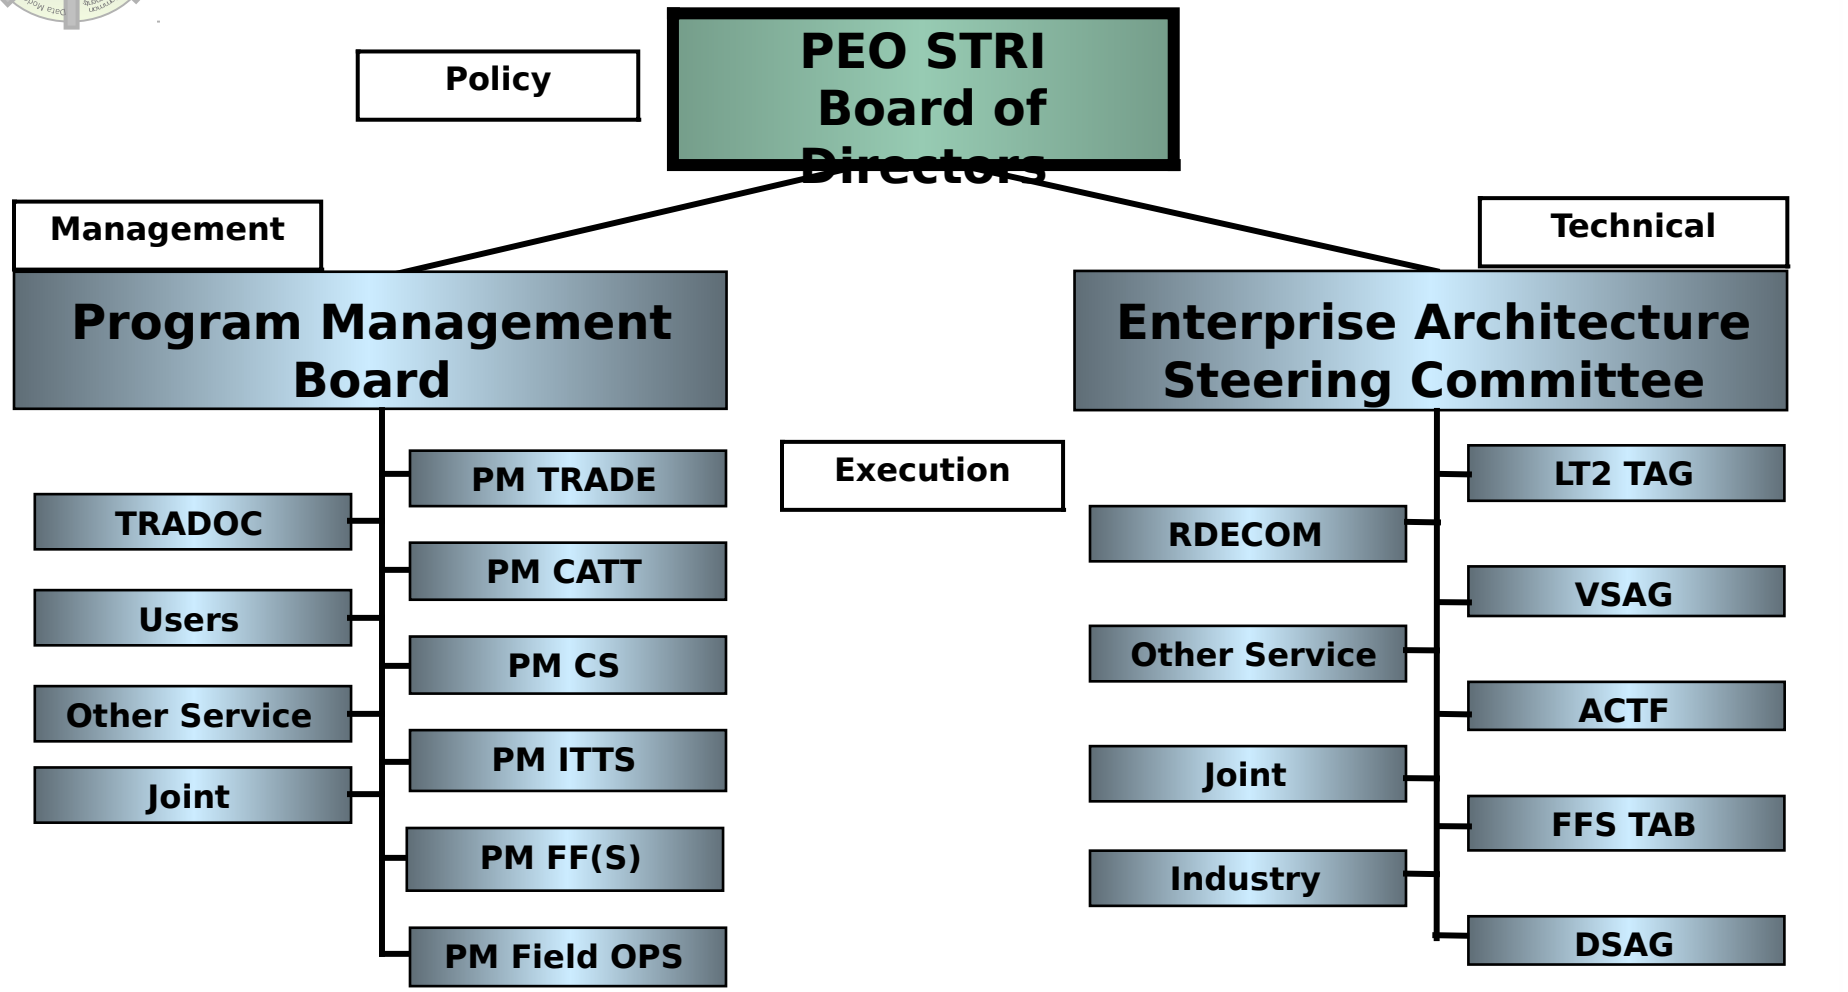
jTIP and EASC Overview

- PEO STRI Project Support Group Engineering Directorate initiated:
  - joint Technical Interoperability Plan (jTIP) for Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities
  - Enterprise Architecture Steering Committee (EASC)

- Goal: To address and solve PEO STRI systems interoperability and integration issues

PEO STRI EASC Mission: To provide technical, engineering, and architectural guidance and standards which facilitate Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities".

Governing Organizations



PEO STRI EASC Mission: To provide technical, engineering, and architectural guidance and standards which facilitate Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities".

jTIP Scope

- jTIP produced to capture PEO STRI's vision for migration toward Interoperable and Integrated capabilities.
- Addresses role of ongoing programs for LVC integration (FCS, LVC-IA) as well as role of existing LVC Product Lines (i.e., LT2, SE Core, ACTF).

PEO STRI EASC Mission: To provide technical, engineering, and architectural guidance and standards which facilitate Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities".

JTIP Proposed PEO STRI I2 Vision

LVC

"The Army's provider of Interoperable and Integrated (I2) Simulation, Training and Instrumentation Capabilities."

TEMO – CTCs, Homestation, Institutional, Deployed

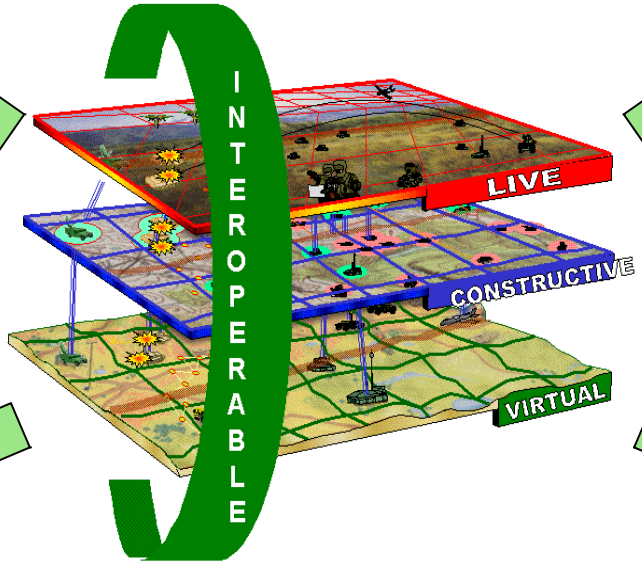
Army

ACR – TRADOC, Battle Labs, TRAC

AF, Navy. Marine Corps, JIIM

RDA – PMs, ATEC, AMSAA, RDECOM

Other Agency, State, Local



To the Warfighter "Anytime, Anyplace, Anywhere"

PEO STRI EASC Mission: To provide technical, engineering, and architectural guidance and standards which facilitate Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities".

Interoperability Requirements Matrix

PEO STRI EASC Mission: To provide technical, engineering, and architectural guidance and standards which facilitate Interoperable and Integrated (I2) Simulation, Training, and Instrumentation Capabilities".

Small Segment of the Interoperability Matrix

Program Short Name	CBS	CSSTSS	TACSIM T6	IEWTPT	CSTAR V 1.0	DBST V 2.0	OneSAF V 1.0	WARSIM	JIS	ACTF	Janus	BBS	OTB	JCATS	CTC OIS	NTC Live Fire	NTC MOUT	JNTC
SRS																		
SAGIS																		
MRTS																		
ATARS																		
CCTT							REQ								X			
SE Core																		
CBS		FI	FI						FI					WIP				
CSSTSS			WIP						FI									
TACSIM T6														WIP				
IEWTPT								REQ							X			X
CSTAR V 1.0																		
DBST V 2.0																X		
OneSAF V 1.0								WIP							X			
WARSIM															X			
JIS														FI				
ACTF															X	X		
Janus
